# EXPLANATION OF ABBREVIATIONS AND REFERENCE MARKS

N—North. S—South. E—East. W—West. m—Miles. Ry or Rys—Railway or Railways.

County Seats in black type.

\*Money Order Post Office.

†Telegraph Station.

1 Northern Pacific Express.

+ Pacific Express.

± Wells, Fargo & Co.'s Express.

All counties, towns, cities, villages, etc., are indexed in the following manner

(See map of Kansas.)

	Pop. '90.
<b>Burlington</b> , Coffey, O-36, (Rys 5-ac,	
31-b) *† + ±.....	2170
California, Lane, 9 m N W Alamota,	
N-11, mail Alamota.	
Ida, Republic, mail Munden.	

Burlington being in black type indicates that it is the county seat of Coffey county; O-36 shows where it can be found on the map (see example below) (Rys 5-ac, 31-b), that it is a station upon each of these railways, 5 and 31, at branches ac and b, (see list of railways, which are consecutively numbered and alphabetically arranged); \*, that it is a money-order post office; †, that it is a telegraph station; + ± refer to the express companies as shown above; 2170 is the population given according to the latest official census.

California is in Lane county, nine miles northwest of Alamota, and mail for this place should be sent to Alamota post office.

The letters and figures following names (like O-36 above) refer to that point on the map at which lines drawn from marginal figures top and bottom, and letters upon either side of map, would cross each other at right angles.

For example, to find "New York City, D-5;" let the diagram below represent the map. New York is seen near the crossing of lines D—D and 5—5.

## PRESS NOTICES.

"The poet's story is dreamy and full of fancy. The professor's story is grim and rugged. The Bohemian tells the chief story of the book. He has views more generally entertained in secret than in public. It is an entertaining book, and by no means an unprofitable one."—*Boston Times*.

"There are imagination and poetical expression in the stories, and readers will find them interesting."—*New York Sun*.

"All three are prettily written stories, very unlike each other, and the characters are very tenderly and lovingly defined."—*Chicago Times*.

"The longest story, 'Galeed,' is a strong, nervous story, covering a wide range, and dealing in a masterly way with some intricate questions of what might be termed amatory psychology. The shorter stories are in a somewhat different vein, but all are well told and readable."—*San Francisco Chronicle*.

"An unusually clever piece of work."—*Charleston News*.

"Marah Ellis Ryan has a good descriptive style, an acute sense of the dramatic in plot and incident, and a mastery of English that is comprehensive and intelligent."—*Chicago Graphic*.

All counties, towns, cities, villages, etc., are indexed in the following manner:

(See map of Kansas.)

	Pop. '90.
<b>Burlington</b> , Coffey, O-36,	(Rys 5- <i>ac</i> ,
31- <i>b</i> ) *† + ±.....	2170
California, Lane, 9 m N W Alamota,	
N-11, <i>mail</i> Alamota.	
Ida, Republic, <i>mail</i> Munden.	

Burlington being in black type indicates that it is the county seat of Coffey county; O-36 shows where it can be found on the map (see example of map) (Rys 5-*ac*, 31-*b*), that it is a station upon each of these railways, 5 and 31, and branches *ac* and *b*, (see list of railways, which are consecutively numbered and alphabetically arranged); \*, that it is a money-order post office; †, that it is a telegraph station; + ± refer to the express companies as shown above; 2170 is the population given according to the latest official census.

California is in Lane county, nine miles northwest of Alamota, and mail for that place should be sent to Alamota post office.

The letters and figures following names (like O-36 above) refer to that point on the map at which lines drawn from marginal figures top and bottom, and letters upon either side of map, would cross each other at right angles.

For example, to find "New York City, D-5;" let the diagram below represent the map. New York is seen near the crossing of lines D—D and 5—5.
